

GRAIN HARVESTERS

FEED QUALITY ASSURANCE

2005

**This is to certify that
GRAIN HARVESTERS FEEDS
are manufactured to the highest of
standards and significantly exceed those
required by legislation**

Food safety is an integral part of our business and we can demonstrate feed security and traceability throughout our sourcing of ingredients and production and distribution processes.

Our Quality Assurance Systems are independently inspected. They cover vetting of raw material suppliers and exhaustive quality control on all ingredients used through to the final finished feed itself and safe delivery to farm.

We are accredited under the AIC Feed Assurance Scheme (UFAS). This scheme has been developed to provide an industry code of practice for the safe manufacture, handling and storage of animal feedingstuffs. It is widely accepted by retailers and processors as the recognised standard for safe animal feed production demanded by consumers.

We also operate an open mill policy which entitles all our customers to visit our country mill. The business has successfully gained the Investors in People Award and all our staff are dedicated to achieving peace of mind for our customers.
